RESEARCH ACHIEVEMENTS OF KING ABUDLAZIZ UNIVERSITY

King Abdulaziz University has achieved unprecedented successes in scientific and technological research. The university has made rapid stride amongst Arabic and international universities to become an educational role model in the region. With global outreach, the university has achieved international recognition in Engineering Mathematics, Chemistry and Information and Technology. The Deanship of Scientific Research (DSR), one of the important entities of the university, has laid down strong foundations of scientific and technical research. Through DSR, the university significantly contributes to the society and the nation by holding values in scientific education and research, and pursuit of excellence through institutional leadership. Through its various research programs, DSR extends opportunities to execute and turn novel and innovative ideas into reality. Major accomplishments of DSR during the last few years are as follows:
